

## **WINNERS ALL ACROSS THE STATE**

### **A compilation of successful programs throughout the state**

Crunching numbers is fun, unless you're an accountant and you crunch numbers for a living. Then, that might get a little boring.

When it comes to crunching numbers that are football related, you never know what you're going to find when you set out. What you estimate to take mere minutes turns into hours and hours and hours, and trying to find the answer to one particular question or curiosity leads to answers for 40 or 50 others.

Here's yet another compilation, this of Keystone State teams that currently have had *at least four years* winning 78 percent or more of their games. Each team listed has a streak that dates through the end of the 2008 season.
